Whispers from The Brighter World
A Fifth Revelation

Tuesday, January 25, 2005 – 10:00 a.m.

Ensuring that humanity opens up to higher reality is one of the projects related to the new era. Man acts like a predator: he ransacks nature, he is guided by interest, he does not care about what exists in forms other than his, and in certain circumstances he does not show regard for his fellow creatures.

"Will spirituality save the world? It seems so; there is every hope for the transformation of human nature.

"Our way is contributing to it. It will belong to a great movement that is starting to take place in this world gone mad, where there is no limit to all kinds of excesses. Happy are those who already endeavour to progress in the divine quest, clearing their way to other prospects of life.

"Many souls are longing for change; a higher power is at work preparing future times on this Earth, and no form of life will resist it. That subtle vibration will imperceptibly transform the nature of all things, preparing people – even more than matter – to adapt to the new conditions heralding new times.

"All falls into place slowly, at the pace of the great universal movement, purifying what needs to be, including the evolution of species. With regards to creation and its objectives, there is no mystery: a constant transformation animates it, including life on this planet, on all levels. Man must change as a result of a drastically modified life, yet one suited for future times; thus are the prospects for the future."
