Whispers from The Brighter World
A Fifth Revelation

Saturday, January 29, 2005 – 10:00 a.m.

Humanity, as a whole, is progressing slowly; this is true and we cannot do anything about it in the present state of affairs. Our aspirants are following their way and are rather well placed in this movement, which is planned and aimed at the elevation of beings populating this Earth. All are not moving at the same pace, but their path is rather satisfactory. The capacities of a living Master are multiplied tenfold at this stage of his mission, and his action is completely in line with a more general movement.

"Our way fully conforms to the expected patterns. Only the divine will gives it its power of action; this is worth emphasising in the current context where alleged 'masters' falsely claim to possess powers that they do not have and act within the framework of so-called spiritual movements. That is not our concern. Our brothers have made their choices in accordance with their feelings, and that is what matters.

"Each one does what he can. On no account do we judge; we only wish to help those who come towards us, having waited for what they have long sought after. Our Mission has also made progress as planned, by adapting to the prevailing spirit. It is following in the same way, that of the history of this world that has reached a pivotal period of its evolution.

"What will happen and how will the transition take place? It is important to sensitise our brothers on this aspect of things and to help strengthen them spiritually, under our blessings."
