Whispers from The Brighter World

A Fifth Revelation

Tuesday, February 8, 2005 – 10:00 a.m.

Immersing yourself in us, in that subtle energy, has become necessary for your life and allows these contacts. By receiving us on an appropriate wavelength, you are doing what will be accessible to the man of the future and will no longer be viewed with astonishment, even with contempt by ignorant people. Researchers are concerned about the universe; they strive to explore other planets, whereas they ignore themselves, being unaware of their real potential.

"Time has not come yet to highlight all these treasures, as power possessed by harmful beings would be a disaster. There are enough negative forces operating in this world; the human condition must change before another way of life is established, which would let subtle forces emerge and operate. A spiritual way prepares that transformation; many of our brothers are still influenced by unfortunate prejudices maintained by certain religions.

"By being refined, the heart is released from useless aspects and progresses towards a constructive truth; this phenomenon evolves in line with a planned evolution. To advance spiritually is to also become lighter and consider life, and especially the after-life, with a broadened view. There are still so many prejudices deeply held in humans on many issues that hinder our work.

"May these messages be understood by the greatest number of people and help them familiarise themselves with that special communication, advantageously replacing all communication products currently on the market, in certain circumstances.

"May the time come when the world of the Spirit will be accessible to all those who wish it and are ready for that."
