Whispers from The Brighter World

A Fifth Revelation

Tuesday, March 1, 2005 – 10:00 a.m.

Only a constant repetition of words and formulas manages to touch the sensitive fibre of the inner self and trigger awareness, hence the contents of these messages. A wise man will find spiritual food in them and will not dwell on the form, but precisely on its substance.

"Here, we are not interested in a stylistic composition; our intention goes well beyond that. What will become of the French language one century from now? Our process, instead, will outlive it. Each one of our readers will discover in due time a formula conducive to their awakening, which is our objective.

"Thus is taking shape the goal of these many messages, offered to those who are willing to read them and benefit from them. Time flies; our Mission grows and many souls are opening up and seeking suitable food. May all that we propose to our brothers meet their expectations! Our speech is not conventional; the awakening of beings at the dawn of this new era must correspond to current realities. Forerunners always had a lot to do to make themselves heard; it is in the nature of things.

"The stagnation which humanity has been in for ages will come to an end, and another light will show men where they can become engaged with a more correct vision of reality that has been hidden for so long. Each one plays their role there too, by following what is in conformity with the current standards enacted by the higher powers and going in the direction of a planned evolution.

"May the era of enlightenment and true knowledge come on this Earth, guiding humans towards the goal with full knowledge of the facts! Our brothers

are on their way; they are monitored and helped in a way that corresponds to their evolution. May they persevere and remain determined to continue!"
