Whispers from The Brighter World

A Fifth Revelation

Wednesday, March 2, 2005 – 10:00 a.m.

As long as this world exists, inspired voices will make themselves heard here below. With regard to our Mission, the whole of these messages will constitute a considerable contribution for the development of our brothers. Many of them will adhere more and more to this principle of communication with higher levels of consciousness, as their own view of this approach will naturally be broadened by a different vibratory contribution.

"Changes will come from this process, modifying little by little the current understanding, which is limited as far as this aspect is concerned. This large collection of messages is not given in vain; they will belong to what will constitute the specific contribution of our way. As the state of mind of our brothers broadens with time, their dissemination will be obvious.

"Nothing should be neglected in terms of helping our aspirants to understand the current limitations of this world. They chose to follow a way and they expect from it benefits that cannot be measured in terms of financial resources, but rather in terms of widening their consciousness and the progression of their work, aimed at releasing them from the heaviness of a suffering humanity bogged down in matter.

"Why, therefore, wouldn't we use means capable of touching their subtle being? Isn't this what they are expecting? We know their major aspirations, beyond the barriers of a mind restricted to the prevailing modes and principles conveyed by the various aspects of a civilisation.

"All must change and will change, without any doubt. Extreme measures will be applied for that, not by men, but by external events that will unavoidably occur. They will reduce a good number of ineptitudes that, having been carried for such a long time, will rudely awaken humans for their own good. The divine power, as usual, will act advisedly."
