Whispers from The Brighter World

A Fifth Revelation

Monday, March 7, 2005 – 10:00 a.m.

Your perceptions have been refined; do you realise the progress made since the first messages! Better than a verbal exchange, this means of communicating allows a special heart-to-heart contact, surpassing the level of emotion and purely human reactions.

"Your exchanges with my son take place beyond that level, hence the significance of their contents. It will surprise some of our brothers, but they will have to become used to it, in the same way as for many other phenomena misunderstood today. They will have to put in a lot of effort to admit what for them was taboo. They will be enlightened in another way on realities concerning these special perceptions, and very significant extrasensory capacity will develop in them.

"Humankind is destined for another view of possibilities in this area, far different from the negative reactions they still provoke. Men underestimate their capabilities in this aspect, whereas they are filled with wonder about the progress of high technology resulting from men's know-how. Their surprises are just starting; life, in terms of its essential aspects, has some other surprises in store for them. These will be no less surprising and unsettling for conservative people hiding behind fixed ideas on what they consider as right or not.

"A small man and a giant – don't they represent life, quite simply, except for some differences? Life is one and manifold in its manifestations. May all our brothers admit the principle of this communication in spirit. Outside the channels known and used by the multitude, many others exist, including this one.

"The era of knowledge is beginning. It contains many other revelations even more surprising, which man of the future will benefit from."
