Whispers from The Brighter World
A Fifth Revelation

Tuesday & Wednesday, April 12 & 13, 2005 – 10:00 a.m.

All life on Earth is based on the principle of polarity, to an extent that men cannot imagine. We cannot here, within the framework of these messages, further develop this reasoning, although it is the origin of any system.

"We will not move away from the strict framework of the spiritual element that is essential for the life of our brothers and sisters in their current process. Time is short for each one of them; to some extent, these writings should help people whose hearts are open to this form of contact, whose veracity will be confirmed in the future.

"Everything, in the manifestation of life, must be balanced. Energies differ and are harmonised, being expressed in many forms complementary to each other. Everything is infinitely renewed in the same spirit; creation is one and in it the same phenomena are repeated according to rigorous laws.

"Our way works within this strict framework. It contributes to the construction of a more accurate system of thought, which will develop in the future when humanity has awakened to a truer perception of divine consciousness within the purity of its creative essence.

"Man has yet to discover everything that is essential for him; he cannot remain indefinitely confined within the current limits of an imagery completely distorting the reality of a being. He must awaken to the cosmic consciousness and begin a long rise that will bring him to knowledge, far from humanity's current state of mind.

"The work, in our way, goes in this direction. It does not call for a blaze of publicity; its action goes well beyond, being part of a salutary movement for this planet that is moving towards a true spiritual blossoming."
