Whispers from The Brighter World
A Fifth Revelation

*Tuesday, April 19, 2005 – 10:00 a.m.*

*My child, lift up your thought; see only the beautiful existing in this world, in souls, in nature and in the entire creation.*

*"Humanity must rise and change to find its true dimension, its prime energy that is fundamental in terms of its truth. Current times herald it. We are preparing it, and our aspirants also devote themselves to it while working for their own elevation.*

*"The future will benefit from it; the cycle of hearts will not end on this Earth. It calls for a better world, more balanced and centred on true values, including a very broad open-mindedness on the divine laws, which finally will be respected.*

*"The golden age, as it is called, does not relate to the metal, which, in our view, is on an altogether different scale from that which will constitute man's future and his goal to be reached. Awakening to divine consciousness, at last enlightened and guided in this direction, his life will be steered in the right direction.*

*"In our way, we are laying the foundations for this action. It will keep growing in hearts, in accordance with the demand. This is how it is regarding the impulses of this very special energy that escapes human astuteness.*

*"These messages will constitute a kind of bond between the past and the future. Heralding great changes, they will contribute to the awakening of souls, supporting the Master's highly spiritualised work, which is based on the realisation of what we announce here.*

*"Let us cultivate hope, that which is sustained by the Divine, the very essence of which is sublime and capable of transforming souls and bringing them to a perfect state, which, conscious or not, all aspire to."*

*Babuji*
