Whispers from The Brighter World

A Fifth Revelation

Thursday & Friday, June 9 & 10, 2005 – 10:00 a.m.

Spare yourself, my child, as your fervour encourages you to push yourself to the limit. You have reached, as of today, an impressive number of messages (4,000), for which you have done your level best. Many French aspirants are waiting for a publication in their language.

"The interest aroused [by these messages] is reassuring; it shows a change of mentalities, and especially, the trust of our brothers and sisters in their Master who found the right words to very adequately introduce these texts. Being divinely inspired, he acts towards open-mindedness, which future times will be able to benefit from.

"The decadence of a way of life based on excessive consumption and profit – to the detriment of the ecosystem and the most fundamental rules of respect for creation in general – is such that humanity is in danger, beyond imagination. The cries of alarm are only partially heard; the polluters prefer to curb nothing and to carry on with outrageous excesses.

"We can only encourage our brothers to progress in a way where they have control and the opportunity of growing with our assistance – the rest not being within our remit, but depends on a collective awareness, decisive for their future.

"May the way of the Spirit be widely open for all our brothers, helped by an unremitting spiritual process and the reading of these writings that meet an

irrepressible appeal of the heart! Times are changing; our Mission is part and parcel of this prospect of the future, with all that it entails in terms of opening the heart.'
