Whispers from The Brighter World

A Fifth Revelation

Monday & Tuesday, June 27 & 28, 2005 – 10:00 a.m.

The vibratory characteristics of the world where you are living are changing considerably, thus fostering a transformation on the level of consciousness. The divine laws are applied according to their own rationale, in a way which man cannot perceive. Men, in general, analyse facts in their own way; they make assumptions based on the sum of knowledge deemed reliable which has accumulated and been defined by their fellow creatures over the centuries. Their entire conception of the universe will need reconsidering in the light of a spectacular development in their approach to phenomena.

"This world of illusion and glaring ignorance will have to adjust to the values relating to a reality that will be surprising for the common run of people. The most spiritually advanced being is in some way blind as he is caught, like all the rest of humankind, in a net restricting him to matter.

"How can men be made to understand the truth concerning their limitations? This would be tantamount to asking a little child to master the art of rhetoric. Only a spiritual evolution in line with the various vibratory aspects leading the being to the desired level will place him in the best condition. Thus, he will be part and parcel of the complex systems of future humanity.

"The work carried out in our way leads to developing this faculty. The messages are also given to this end; their vibration crescendos, hence the interest to read them in a specific order as we have often repeated.

"May all our brothers abide by their usual practice, as well as this reading, to be in tune with the dawning new era."

Babuji
