Whispers from The Brighter World
A Fifth Revelation

Tuesday, August 16, 2005 – 10:00 a.m.

Love feeds life – that which does not perish and whose substance is related to the Great Whole. It is the bond between the Creator and life in all its forms, each one of which has their specific characteristics though equally important to Him. All is to be respected in this world, which humans do not do. Imbued with what they believe to be their superiority, they destroy and kill shamelessly, often for pleasure and without any qualms.

"The created world is characterised by solidarity in its energies. They all include the same principle governing their many manifestations. Man, as a unit created for unknown purposes in this world, continues his evolutionary cycle with all the necessary attention. The goal is to make man climb up all the rungs of this long training process, raising him in terms of vibrations and bringing him to another status.

"All these subtleties are beyond the understanding of most incarnate beings, likewise for the other forms of life that are bustling about in their processes of existence, each species having its own process. All is orchestrated in a subtle way. Anomalies, as perceived by men, are rare and they have their 'raison d'être'.

"The human being, whatever his life and his appreciation of it, is an element of a vibratory mass that is considerable and essential to the balance of the whole. The complexity of all this does not, currently, allow a more detailed study, under penalty of appearing exaggerated.

"The guiding principle of these basic problems is unknown to humans, for the good reason that in the current state of their evolution, they would not understand

the true meaning of it, both very simple and very deep, as far as the reality of life is concerned. God is Great is the conclusion."
