Whispers from The Brighter World

A Fifth Revelation

Monday, November 28, 2005 – 10:00 a.m.

Life, in its movement, manifests very diverse aspects which men must learn how to manage on a daily basis. Would uniformity and complete quietude make them advance and grow in the face of the many uncertainties which any incarnation has in store? That seems impossible. Each incarnation offers a different way of life, allowing one to develop and strengthen in the face of difficulties. This process is very long; through it, only a true awareness and the determination generated by it will allow seekers to find their bearings and to act according to their personal inclinations.

"Our way has started to spread on this Earth, in an arrangement conducive to the blossoming of the new era. The foundations of this era are being laid very slowly, preparing events of the future. A new state of mind must prevail in this world. Consciousness is gestating and will yield a revived humanity equipped with an unprecedented open-mindedness, completely distinguishing it from today's humanity. In this new context, humans will have recourse to means different from those of today, concerning their spiritual growth. Being lucid, they will want to get to the heart of the matter, as quickly as possible. A complete reappraisal will occur as transformations take place, setting up new structures in which our way will find its place as a matter of course, since it was planned in this spirit for a long time. May our teaching, associated with an unremitting practice, prepare

these future times according to the great plans of the Divine Omnipotence. May all our brothers and sisters faithful to our Mission be blessed!"
