Whispers from The Brighter World

A Fifth Revelation

Monday, January 9, 2006 – 10:00 a.m.

It takes time to understand what life depends on and where the main thing lies. The purpose of these messages is also to help our candidates to become aware of it. In the future, these messages will be published in their entirety. 'All has its raison d'être', as we have so often repeated. They will be known and appreciated for what they are. In their great simplicity, they will manage to touch hearts much more than sophisticated, philosophical, and conventional essays. Our goal is very different; from the outset, the intentions are clear. May the greatest number understand this and be rid of prejudices that are out of place here. Since the beginning, the many exchanges included in these writings are not puerile or insignificant. They are to be discovered by those who are ready in terms of getting involved in an active and simple spiritual process. They are meant to explore other resources, including a teaching coming from the world of the Spirit, while realising that human nature is weak and powerless in the face of the vagaries of life on this Earth. An elsewhere exists; this pronouncement should reassure and encourage people to carry on in terms of going deeper in the understanding of a vast network where life continues on other levels of consciousness.

"The present evolution of humanity imposes limits on this subject. The new era will open the doors wide on this unknown that intrigues humans who access this reality. Having reached this stage, our teaching cannot neglect truths of this kind. These truths influence not only the present, but also the future of our candidates. Times are changing, and we must adapt to the spirit that foreshadows this era of transformation and upheavals of all kinds. Earthlings are not isolated

on their planet with no possibility of communication with parallel worlds. Such communication requires appropriate means, which are beyond the current abilities of the majority of them."

Babuji
