Whispers from The Brighter World
A Fifth Revelation

Tuesday, February 21, 2006 – 10:00 a.m.

The negative effects of this world affect all human beings and this process is intensifying. How can one escape it? Generally speaking, the question cannot be answered in the current state. Spiritual life is a recourse. It brings a balance; interiorisation brings about calm and detachment from disturbing elements. This serenity helps to face up to things and stand back in many circumstances. Today's man is confronted with a constant and growing negative charge. How will he cope with it in the years to come? Insidiously, these disturbing waves unsettle humans, as they do not realise to what extent the effects of a so-called progress affect them. We can only note it and warn them. It is up to them to protect themselves as best they can. A whole process has started on this Earth and nothing can stop it. Men are mainly to blame and will have to suffer the relevant consequences. One cannot defy with impunity the natural laws; the effects of this situation will be painful for all. That's life in its manifestations; the principle is basic.

"The big changes in this world result from a set of facts where man will be the determining factor in this century. All that lives here below is interlinked; many have not yet understood it. All of creation is governed by the same laws and by one single energy linking the worlds, in their subtle and essential aspects. What affects this planet results in a phenomenon of significant decline spreading in an alarming way, on all levels. It endangers an essential balance, surpassing by far what relates to this planet. Without real awareness on this issue to limit the damage, the consequences will be heavy.

"That is the way it is."
