Whispers from The Brighter World

A Fifth Revelation

Monday, January 8, 2007 – 10:00 a.m.

These sessions in Bangalore were successful and this is worth mentioning herein. The repercussions will be positive for our Mission; they will leave a significant mark on it, opening people's mind to a planned and irreversible evolution. We are preparing our brothers and sisters for this change already alluded to; it will occur gradually, according to specific transformations at the vibratory level that will generate new forms of life, and in particular, sizeable impacts on the human race.

"An era of change requires preparing far ahead of time; a whole balance has to be respected as creation does not stand any vague approximation in its slightest manifestations. Before coming into being, everything has to be judiciously set up. Our way complies with this irreversible movement; it has at its disposal the necessary solid elements on all levels for its fulfilment in the Absolute, according to a plan that was designed a long time ago. Each step taken in this direction is constructive; divine laws are accomplished in secrecy, slowly but surely. Humans are limited in their means of assessment; they conjecture and judge according to their understanding, but what is their logic worth in the face of this divine omnipotence which many would prefer to ignore? When necessary, it will sweep away the best-laid plans according to the human criteria of evaluation.

"The upcoming upheavals often referred to here will make humans revert to more appropriate behaviours, which will lead them to a sense of wisdom that is currently missing in these times of excesses of all sorts.

"May our way help our brothers and sisters to really become aware of the current situation in the world; many warnings given in various ways have failed to sensitise humans to the tragedy that is taking place here below. May all be enlightened – that is our wish."
