Whispers from The Brighter World

A Fifth Revelation

Wednesday, January 24, 2007 – 10:00 a.m.

Anything done without effort, without involving the whole self, cannot in any case have the same impact. We know this, as we experienced it ourselves. You give us the best, my child, which is, in some way, the quintessence resulting in these lines whose substance will make its way into the hearts. In a short time, our remarks have touched many of them. These messages have taken off; the future is theirs."

Babuji

The Medium: "How can one resist the attraction of your hearts! In spite of such a great tiredness, they manage to enthral mine and ensure that it listens to you out of love. It lets itself be carried away by the redeeming flow that rekindles its faith and courage. Life on Earth is a long series of struggles. Managing to serve you, whatever the cost, is most beautiful and most gratifying."

"Yes, service is the noblest goal when the heart is overcome with love. My dear sister, the ways of God are unfathomable. They bring us where we precisely must be, without our even being aware of it. Our rising into the world of the Spirit is unusual, given that we are incarnate. Only a significant widening of consciousness can make it possible, by divine grace. Human beings – in particular our brothers

and sisters – should not be blind to these concepts related to life beyond this world. These messages have no other purpose than helping them in this.

"Our Beloved is waiting for us in his space of beauty – a non-artificial one. As a medium, he prepared people's minds accordingly, with a view to bringing them to a more valid appreciation of these phenomena. He knows that an important work must be achieved in this area; the approach to a certain 'reality' will leave its mark on future times, particularly in our way where a lot remains to be done on this aspect. Spiritual evolution must include these concepts that still seem to be abstract to many of our aspirants. Although we cannot reveal things any further, this approach heralds the new era where our Mission will have a choice place. Thus a definite evolution to where it will belong is taking shape. Let us love infinitely. Only love can change the world; may all humans become aware of it."
