Whispers from The Brighter World
A Fifth Revelation

Saturday, October 27, 2007 – 10:00 a.m.

We must adapt to your habits, you Earthlings, who have odd ones in certain areas of the Earth. This 'daylight saving time' must be taken into consideration in our contacts, but it is no obstacle to them. We are here no matter what happens, you know this. Humans make life terribly complicated for themselves with these kinds of habits that do not change the face of the world, but more seriously disturb the biorhythms of the human body in a world already so unstable in some other respects. May our brothers and sisters, through diligent practice, maintain their vibratory balance in the face of the multiple disturbances that affect them. Distraught by a life not respecting the basic rules meant to maintain them in good physical condition, everyone must act as best they can to overcome it.

"Following a spiritual way is to find a true meaning to life; devoting oneself to it is a sign of praiseworthy wisdom. Our blessings are bestowed on all, and it is up to everyone, according to their state of heart, to receive them."
