Whispers from The Brighter World

A Fifth Revelation

Sunday, November 4, 2007 – 10:00 a.m.

These many messages are our treasure; it is time to become truly aware of this. This abundant crop is meant to nourish the hearts of our brothers and sisters, and that for a very long time. These messages will take on their full meaning when the world of humans has reverted to a more correct view of things.

"We are constantly repeating ourselves, and we have to, given the current picture of this civilisation having lost the true sense of values. Many human beings are suffering for many reasons, including all sorts of excesses capable of destabilising the strongest ones. A contemporary sage said that only spirituality will save the world. We fully concur with these remarks. That moment will come; so is it planned and all of us here are preparing it as we care for the future of humanity. A critical step is yet to be completed; it will not be without difficulty and many human beings will not be able to cope with it. May all our aspirants be strengthened in their practice. It will help them to face and adapt to the new laws arising from the emergence of an energy that will characterise the future era."
