Whispers from The Brighter World

A Fifth Revelation

Monday, December 17, 2007 – 10:00 a.m.

From time immemorial, great Beings have come on Earth to deliver a message aimed at advancing humanity in its understanding of the divine power, yet humanly inexplicable in these times of obscurantism. Those who believe they possess knowledge may think what they want, but their knowledge does not address the true issues; time has not yet come for that.

"Many events will have occurred on Earth before mankind's vision widens to what is essential.

"Life's vibratory subtlety escapes them completely. How could it be otherwise in this era of darkness on the planet Earth? All must change. We have said this before: humanity gets bogged down in excessive materialism leading it astray from true moral values and a spiritual elevation that can transform it.

"Practising in our way gives the aspirant a satisfactory approach to what is essential, a vibratory level capable of favourably harmonising his subtle body by detaching it from materiality. This does not mean a lack of engagement on the human level, but it is an approach to bliss meant to make him better cope with life."
