Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World
A Fifth Revelation

Friday, December 21, 2007 – 10:00 a.m.

As the figurehead of our Mission, the Master is the embodiment of the divine power, in male form. The female aspect, however discreetly alluded to through these messages, will give him the subtle touch, symbolising the balance of human nature in its manifestation in this world. This aspect must not be overlooked; humanity of the future will be sensitive to it. What seems unimportant today will then take on its full meaning and will be considered as a true resonance punctuating the spiritual life of the very many aspirants of spirituality – as offered in our way. This is evidenced enough by historical precedents, which do not need to be depicted. Human beings instinctively recognise themselves in this representation of a mystical ideal involving the Master and the chosen disciple – suggesting the role of incarnate femininity on this Earth. All this had to be emphasised; that is the way it goes."
