Whispers from The Brighter World

A Fifth Revelation

Sunday, January 13, 2008 – 10:00 a.m.

Everything is being set up, slowly but surely. We must forge ahead, as per the requirements of our Mission in this world. Reactionary people will have to adapt or else regress; it is up to them. Opposition to change does not build the world; that of the Spirit has its own laws, which do not take into account human limitations. Evolution on this planet includes phases where humans must follow stages of a progression, whose effects we measure. Everything in its own time; our teaching heralds the broadmindedness of future centuries. Happy are those who understand it and can adapt themselves to our proposals.

"That is life. May all be guided according to our wishes; they are in conformity with the becoming of humanity. The small man must go on his way; we are helping him as best we can, at least those who actually want to trust us and adhere to our proposals. Time will confirm our views. May all our brothers and sisters be enlightened on the evolutionary path! May all be strengthened and blessed in this regard."
