Whispers from The Brighter World
A Fifth Revelation

Tuesday, September 23, 2008 – 10:00 a.m.

The time has come when mankind's unthinking and irresponsible behaviour must be paid for. Many warnings have been given in vain; profit prevails over everything in highly industrialised countriesand others.

"Devastating repercussions are underway and their pace will accelerate; everything has its price in this world where innocent people will also undergo the same fate. The coming decades will be heavy for humanity. The order of nature must regain its prerogatives and be respected as it should be. Each one must question his involvement in this destructive program.

"Consuming and throwing things away unscrupulously does not contribute to cleaning up the environment. Respect for nature is of primary importance – more than ever. It is time to become aware of this. It is up to each one of our aspirants to engage in this movement of respecting the divine laws. May they all be convinced of this."
