Don't focus on the number of abhyasis; didn't I tell you in the past: Sahaj Marg will have to be purified one day? Don't be afraid about that. The number of our associates in the world is rising. Those who are not motivated drop off; that is preferable for them and us. Those who really want to advance—and they are many of them—do not have to linger over the statistics of such-and-such group. It is the personal condition of each one that matters and the benefits he derives from it. This mobility is inevitable and necessary, it is in the nature of things; humans are naturally changing. You who persevere, who advance, for our greater joy, we see your efforts and we help you in your process.

"We are by your side in trying moments; we inspire you. You may not necessarily sense it, but we are there. The road seems long when the goal to be reached is far off. Do not see it this way; you have a Master who leads you towards the ultimate point which you will reach. Be trustful and surrendered to his love."
