Whispers from The Brighter World
A Sixth Revelation

Wednesday, May 27, 2009 – 11:00 a.m.

Each group of people has its own laws, habits and religions. Our spiritual way goes beyond, as the law of the heart is universal. All must assess it at its true worth and in their own time.

A spiritual journey is personal, under the higher guidance of one's Master. For every individual, it is a personal choice, not one imposed by their milieu, their race or their culture. Only the call of the soul should guide an abhyasi in this process.

This fact is reassuring, and the future will broaden the comprehension and tolerance of beings, concerning choices of this kind.

None can assume the right to impose their beliefs; God alone predisposes beings to their own way of following Him and loving Him. Love is the only energy capable of transforming humanity; it is a universal benefit made available to all.

May our brothers and sisters benefit abundantly from it, and thus progress towards the ultimate goal.

May all be blessed and strengthened in the face of adversity.

Babuji
