Whispers from The Brighter World
A Sixth Revelation

Thursday, September 3, 2009 – 10:00 a.m.

The redemption of the world will take place through water and fire. The phenomenon is already occurring to a lesser degree here and there, but it is likely to gather pace inexorably, according to divine laws. All rules established by humans could become obsolete, and everything would then need to be reconsidered from the standpoint of these laws forgotten and ridiculed in the saddest manner. In human terms, how long will it take for these phenomena to occur? Nobody can predict it exactly. Mentalities must change, which will entail a lot of work; necessity will know no law. Faced with their fear, human beings could do some soul searching and envision a new conception of their lives here below. A complete upheaval is necessary. On a worldly time scale the prospect of an unprecedented mutation may require decades.

The principles of life must evolve in terms of the reproduction of all species. This mutation has been planned for a long time and will occur in due course. The wheel of life spins round and generates change, which is the very principle of life. Human beings must evolve and change in their body, and especially their mind.

May the time for a better world come soon, bringing the utmost respect for divine laws. We are working towards that. It is up to you to become aware of it and to act.
