Whispers from The Brighter World
A Sixth Revelation

Thursday, September 10, 2009 – 10:00 a.m.

You see that my son also has spoken about this subject. So let us forget it and focus on the main thing – the effect of these messages on people's minds.

The messages will be used as a topic more and more during gatherings and seminars within our way. They henceforth belong to our heritage, adding to the spiritual richness of the Sahaj Marg Mission. Times are changing; hearts are opening up imperceptibly and thirst for a teaching in keeping with a sophisticated spirituality – one freed from the taboos and limitations imposed in the past by restrictive movements within religions. Reality will eventually have to be revealed to the world today, or tomorrow – this is inevitable and certainly necessary. Human beings cannot indefinitely remain ignorant of this truth. It must be recognised by all, at all costs. This is in the nature of things, and nothing can be changed about it. Future times will open up broad perspectives on higher reality. A great step will be made in this direction, and we will contribute to it, modestly, on our level. Let us focus our minds on this objective: the open-mindedness about an essential truth, that which will inevitably be revealed to all humans – and why not right now, for those of our abhyasis who have reached adequate psychological and spiritual maturity.

May all be blessed and strengthened.

Babuji
