Whispers from The Brighter World
A Sixth Revelation

Friday, January 8, 2010 – 10:00 a.m.

Major upheavals lie ahead for the Earth; things are taking place imperceptibly in view of this eventuality. It will be monumental on the scale of time and in terms of its consequences. What humans have developed will be destroyed, as it is fragile in the face of the force of destiny; this force is marked with the divine seal. Although they have complex theories and certitudes, these humans may not even witness that destruction.

Great civilisations already disappeared from this world without people of today admitting it. They believe they have attained the acme of knowledge. It is nothing of the sort, but they cannot understand as they nurture the assurance that they have the keys to knowledge on all levels. Time will produce its effects – this is unavoidable.

India will remain a land of refuge. Thus privileged, it possesses high-level spiritual principles, which will also defy time. Our way belongs to those principles. Meditate well on these comments.
