Whispers from The Brighter World
A Sixth Revelation

Monday, January 10, 2011 – 10:00 a.m.

My dear daughter, we have come such a long way over the years. You have broken the record in this matter. Thousands of messages have accumulated by divine grace, and also by your courage and perseverance in serving us in greatest surrender, carried by this subtle and powerful energy, which is divine love.

These writings will cause a lot of ink to flow, as is said colloquially. They will be studied, discussed and accepted by many brothers and sisters who were initially reluctant to read them. So has it always been in history; all that is new surprises people. Humans are conservative. They stick to what they know and advance cautiously in discovering possibilities unknown to them. Minds must be open to knowledge – this is imperative for humans to evolve. These concepts should no longer be ignored. This turning point for humanity is vital: not to advance means to regress. May all our aspirants open up to knowledge.

Babuji
