Whispers from The Brighter World
A Sixth Revelation

Friday, January 21, 2011 – 10:00 a.m.

The dedication of this [Dubai] ashram is another milestone in our Mission, leading towards what it will be in the decades to come as it expands worldwide, according to the divine plans! This is in the order of things. Humanity is at a pivotal point in its evolution; only spirituality can help it, and it will be critical in the future. We are repeating ourselves, but why not? Time is pressing and cannot be made up. How could we not insist on this essential point? We owe it to all our brothers and sisters who are on the path, a spiritual way whose influence will keep growing in the future. Its simplicity is winning over hearts, and our method helps them almost without their knowledge.

The heart of an abhyasi who is committed and faithfully devoted to sadhana will transform imperceptibly. It is beautiful and comforting to see, after this long cycle of existence, the effect of our method in this world. We do not work miracles; we simply help our brothers and sisters to grow, to become aware of a reality which is still beyond many of them. Humanity is moving slowly, at the speed characterising this planet. It is what it is, but as for our abhyasis, we can help them, and for this we are doing our utmost. Our Mission has a Master of great stature; he not only works for its growth, but also contributes greatly to the expansion of its aura.

May the divine powers keep blessing this way of love, as we see it, for the good of humanity. Hitherto humans have sorely lacked this subtle energy. Nothing is irremediable; therefore, let us act for the good of all those who want to follow us beyond the vicissitudes of this world. May all be especially blessed and strengthened!
