Whispers from The Brighter World
A Sixth Revelation

Friday, July 15, 2011 – 10:00 a.m.

The beauty of nature – its diversity is in itself a love song dedicated to the Creator of all things. He has given to humanity this wonder which many neglect; they do not appreciate the true value of such a treasure. Mother Nature holds real powers, from which humans benefit in many areas. What would human beings be without this luxuriance, this incredible abundance that allows them to live and to feed on it? Many respect and admire it. In its infinite diversity, it is the work of the Divine. It was necessary, at the end of this course of 'messages,' to allude to this priceless treasure offered to all life on Earth.

'Life feeds on life.' Let us repeat that it is good to give thanks for all that creation generously gives.

May all our brothers and sisters subscribe to this and sing this hymn of love dedicated to the entire creation.

Babuji
