Whispers from The Brighter World
A Sixth Revelation

Sunday, July 31, 2011 – 10:00 a.m.

A breath, a nothing, and nothing more' – so is humanity, nature and the whole of creation. Everything is fleeting in this world, but human beings do not yet realise it. They revel in their dreams of an eternity on Earth; without such dreams would they be as creative...?

They have a need for recognition and to assert themselves; there lies their challenge. Thus is fulfilled what must be, constituting the 'progress' of humanity. Is it progress, in the sense that we understand the term? Is the creature any better or more open to higher reality? Only the highest authorities can appreciate the true value of one's progress. Are our abhyasis changing? Are they more respectful of divine laws and of their brothers and sisters in general?

We have no magic wand; our method works for the good of each and every one and for their spiritual openness. All benefit and advance towards the Immutable Peace with our special blessings.
