Whispers from The Brighter World
A Sixth Revelation

Monday, August 29, 2011 – 10:00 a.m.

Think of the future, of what the world will be tomorrow. Much confusion will reign on Earth before a little more wisdom finally emerges.

Our system will find its place in the world. Many people will become aware of their smallness before the eternal. It is time that a significant spiritual movement truly elevated people towards a wealth that is lasting and sound, and that humans recognise the fragility of life in this realm of matter.

'A breath, a nothing – a person is nothing more.' May all fully realise it and follow a spiritual path that can elevate them, transforming their vision of things.

Everything moves forward slowly here on Earth, and yet, in an instant, everything can be destroyed. May all our brothers and sisters become truly aware of this and change their lifestyle for good.
