Whispers from The Brighter World
A Sixth Revelation

Saturday, September 10, 2011 – 10:00 a.m.

Let your heart sing; there lies your comfort. Forget the gossiping and egotistical actions of human beings, as well as their pettiness – there are better things to focus on. See only the good in everyone – as advocated by a great Christian saint [Saint Francis of Assisi] whom you admire. Open your heart more and more to the divine splendour.

Not everyone appreciates these messages; it is their right. As for our fervent readers, they enjoy them fully. Beyond the words, the messages carry a significant energy intended for our aspirants. Sensitive beings feel it and make progress in their journey. An open heart senses all of this and feeds on a special vibration that is beyond human points of reference. Future times will reveal many secrets about human nature that are so far unknown; the time has not yet come for that. The future will allow for a step forward, a more real approach to the possibilities of the human being. Another dimension of consciousness will be established on Earth, opening up vast horizons of knowledge.

Blessed are those who advance on the path of evolution. They understand what we, in different ways, offer them. Nothing is done without reason. It is up to our most open-hearted aspirants to advance without wasting time, which is more precious than they can imagine.

We wish the best for all, towards an expansion of consciousness, under our special blessings.

Babuji
