Whispers from The Brighter World
A Sixth Revelation

Monday, October 17, 2011 – 10:00 a.m.

A wise man, a politician, once said that only that which is spiritual will be able to save the world. This man was a visionary. Spirituality will be the only means for humanity to overcome its present condition, one that is sad in many respects. How to make this need understood? Most humans are focused on profit and pleasure in all its forms. A balanced life can leave space for a truly liberating and constructive approach for the aspirant and the group he or she represents.

This life choice transforms the being, opening up promising horizons. The path is all mapped out for each one. Faith and fervour carry one to the deepest part of oneself. How many of our brothers and sisters are active in material terms and fervent in their longing for the Divine? It is all compatible: faith, ardour and even service – a fervent heart can achieve it all. There are many examples in our Mission to prove it.
