Whispers from The Brighter World
A Sixth Revelation

Monday, November 14, 2011 – 10:00 a.m.

The most insignificant words herein can touch hearts. They carry a special vibration perceived by sensitive beings. Blessed are those who understand it and take advantage of this opportunity. Humans of the future will be more refined and more able to understand that which is elusive. Many of our brothers and sisters are regularly nourished by these messages. They thus have an additional opportunity to benefit from our energies by uniting with the inner Master. This kind of reading done with the heart fosters interiorisation – there, where wonder is built; there, where the soul goes into raptures. Nothing is left to chance. We act for the good of our aspirants; it is up to them to understand and make the most of it.

Blessings to all.

Babuji
