Revered Babuji Maharaj

Whispers from The Brighter World
A Sixth Revelation

Tuesday, February 14, 2012 – 10:00 a.m.

There will be so much more to say, and yet with the thousands of messages given so far, haven't we discussed all that is required for spiritual life? Repetition is necessary; human beings need it not only on the physical plane, but also at the spiritual level where the benefit of knowledge and an openness at this level enables the development of their whole being. Human nature is very complex. Following a spiritual way provides reference points regarding a being's deepest aspirations – aspirations of which most people are unaware. Life on Earth is short in the face of the Eternal. One should waste as little time as possible, and thus advance on the path of human evolution with sufficient spiritual openness. May we contribute to the path of human evolution in Sahaj Marg, where we try to give our aspirants the best in this domain.

May they be blessed and strengthened.

Babuji
