Whispers from The Brighter World

Saturday, July 21, 2012 — 10:00 a.m.

How can we not revert to this day — much awaited by us all here and by many of our abhyasis! It is good to see the effects of this expectation upon so many hearts. From year to year we see the growing awareness of these important events in our Mission. As a whole, our Mission is affected by this vibratory configuration that is capable of sensitising many of our brothers and sisters. The event goes far beyond a birthday celebration, which is why we are insisting more and more each year on its importance. Parameters change over time: cosmic energy produces results impalpable to humans. So many phenomena remain unknown to them; the Earth is only a particle of matter within the Great Whole. No human being really grasps the truth of creation. It is beyond the reach of the most finely tuned observers.

Many phenomena govern life here on Earth. The multiplicity of this action is beyond understanding. Regardless, the important thing for humans is to truly find their bearings, go to what is essential and organise their lives accordingly. An active life does not in any way exclude a spiritual process; succeeding in one's incarnation entails many challenges — its apotheosis is spiritual realisation. May all our brothers and sisters focus on this goal and make a success of their acts of consecration and offering to the divine power, unique in its principle. Blessed are the pure in heart, they will see the light. This is in the order of things.
