Whispers from The Brighter World

Monday, July 30, 2012 — 10:00 a.m.

Our dear Parthasarathi is in a state of extreme tiredness. This is in no way prejudicial to his mind: he is alert and extremely lucid about the doings of all our brothers and sisters, without neglecting his prerogatives as Master of a very precise and far-reaching spiritual action. Abhyasis have nothing to worry about: their progress is in no way impeded. Faith in their Master must be expressed more than ever; such is our recommendation today. May all our abhyasis unite in a spirit of peace and love. Isn't the latter the cure for all ills on this Earth?

"A spiritual Master, even a high-level one, is not spared: his physical body has to bear the suffering inherent to mankind. Over all these many years our very great son has demonstrated remarkable courage. He has defied so many negative elements that arose on his path — many of which resulted from human ignorance displayed by some people. Let us see only the greatness, loyalty and faith of many in their Divine Master who is totally committed in his duties for the good of all beings on this Earth and beyond. May peace suffuse the hearts against all odds, under our very special blessings."
