Whispers from The Brighter World

Saturday, August 25, 2012 — 10:00 a.m.

The movement of life is incessant; nothing can stop this process regardless of events. No earthly kingdom escapes it; humans, animals and plants demonstrate it. However, spiritual life is beyond this principle: the divine laws operate here in a completely different framework that is more subtle — and ignored by so many humans. Yet this aspect of life is of the utmost importance; it is worth focusing on with a view to working towards an expansion of consciousness.

What remains of a body of flesh? Nothing that will determine the continuation of life beyond the material plane. The major attraction here below is to rise spiritually. To be incarnate and reincarnate allows human beings to be fulfilled in what is important to them: the elevation of their souls. The understanding of this process is a great step forward in this journey. So many people ignore and completely neglect this aspect of life! Blessed are those who are opening up to knowledge and are following a path capable of accelerating this process. Following a spiritual way based on this principle is beneficial in every respect and saves valuable time.

As long as it takes, all of us here will be together with our Chosen son; then, in the future, with his successor who has been chosen and designated by the living Master. Unity is strength; it will continue to manifest itself in our Mission with a view to its ceaseless expansion. Loving one's Master entails respecting his decisions; there lies true surrender in this highly spiritualised framework. May all our brothers and sisters become aware of their gratifying status under our constant blessings."
