Whispers from The Brighter World

Monday, August 27, 2012 — 10:00 a.m.

Once again, the ritual is being performed. Do our abhyasis imagine the number of messages given so far? This is unprecedented in the history of a spiritual way; it is noteworthy and represents a true treasure for our Mission.

"The benefits of a practice like ours are reinforced by reading books and messages as well as by other audio and video means currently available. Consciously or unconsciously, so many humans aspire to join in a way, the way of the heart, that is capable of opening up infinite prospects to the motivated seeker. Benefiting from a transmission like ours may not be palpable to all aspirants, yet the transmission exists and hits its target, regardless of whether it is felt or not. [This advantage of our way] is rare. It is wonderful to see committed beings act, serving this Mission with ardour; we return the favour to them. The action of our way is fully manifested; not only does the power of the incarnate Master remain unabated, but it reaches its point of excellence. All this is strengthened by the constant support of the alliance of united Masters who are very attentive to this action that is so critical on Earth. More than ever, it is a necessary action; so many people are seeking, many of them are doing so unconsciously. They feel inside themselves a void, an emptiness, which they fail to fill without understanding the reasons why. The heart has its own reasons, the way is there inside them; all it expects is an opening to the Divine.

"Blessed are those who find it and advance, being convinced of the benefits they can have at all levels. May peace and love transform this world!"
