Whispers from The Brighter World

Sunday, September 9, 2012 — 10:00 a.m.

The special vibration that drives you in these moments can be felt by our sensitive brothers and sisters when they read our comments. Beyond words, a subtle energy is being transmitted here; our sensitive aspirants who are open to reading these messages benefit from this asset. Nothing should be overlooked in a way like ours where there are many aspects worth considering. Anything that can help in a spiritual approach must be transmitted, hence our insistence in overcoming any reluctance.

"The world of the Spirit is organised accordingly; helping our abhyasis is a priority in these pivotal times when humanity is at a turning point in its history. Somehow, deep changes are imperative in this world; it is the most effective way of safeguarding in this area. God's ways are unfathomable and are not always in keeping with what humans wish. Perhaps it is better this way considering that the actions of the largest number of people are solely focused on material aspects and making a profit. Many barriers will have to be overcome, and yet we do not rule out that better times will come in which a higher level of consciousness will set limits to evil, thus establishing new laws in line with a humanity that will be open to an aspect that is more just and is conducive to the evolution of human beings. Many of them aspire to it. May all be blessed and strengthened accordingly."
