Whispers from The Brighter World

Saturday, September 15, 2012 — 10:00 a.m.

This contact takes place against all odds. Regain your calm, peacefulness is required, there lies the daily challenge wherein the best is achieved.

"Can you imagine the impact of these writings? Tomorrow, even more so than today, they will have a choice place in our Mission. Hearts cannot be won over overnight; a human needs time to assess facts at their true worth. It took us twenty years of contact to normalise this daily feat, and yet it is and will remain one of the noble hallmarks of our Mission.

"Our dear Parthasarathi has given our Mission its present stature: a wonder in such a short time! We admire him, this Great Chosen Being of our united hearts. He is and will remain for us one of the most brilliant symbols of this way of the heart, whose extension at this level will keep broadening and thus justify what we have been proclaiming here for a very long time. The objective of our Mission is to conquer the hearts. By the grace of their Master, many people are able to access what is written here in the silence of the heart, which contributes to an ever-wider diffusion into the hearts of our faithful abhyasis. All of them are advancing at their own pace and they feed on our teachings that provide them with new notions in relation to the understanding of things in the realm of the Spirit. Substantial changes will occur on Earth; it is advisable to prepare our brothers and sisters and to emphasise the plurality of worlds. All are able to understand phenomena that for a long time have been deliberately concealed. The time has come when, for their own sake, humans must advance in this knowledge that has been kept secret for too long.

"May all our abhyasis open up to knowledge more and more."
