Whispers from The Brighter World

Wednesday, October 10, 2012 — 10:00 a.m.

The 'brighter world' is a beautiful image, but the world of the Spirit is a reality towards which the incarnate being has to go on his journey to the ultimate goal. We offer our abhyasis a real approach that is geared to that; it is up to each one to consider this option and act accordingly to achieve success. 'An incarnation is an opportunity given to man so that his destiny can be fulfilled' — this says it all and going in this direction is a sign of wisdom. Many of our aspirants are opening up to this reality. They understand the importance of such a path.

"Our way is unique. It offers a real means to move forward and to seize an opportunity that is not commonplace. We do not claim to work miracles; they are there but are not revealed to the eyes of humans. The essential aspects are accomplished when and where necessary. Many of our brothers and sisters are growing in wisdom. They realise that the purpose of life lies there. While pursuing their activities, they participate in this great and redeeming movement through a diligent practice that bears fruit.

"The world of 'the Spirit' is vast; so many opportunities are available to well-informed seekers. Beyond this Earthly world, they can pursue a process appropriate to their spiritual growth. Everything is planned for each one. Our aspirants are monitored effectively; a living Master takes over beyond this physical reality that is altogether transient. Wise are those who are advancing towards the goal and who understand the need for this commitment. It prepares them for a progress capable of fulfilling their wishes in this area.

"Everyone finds within themselves the motivation, the impulse of the heart that is uncompromising in this area where the determination of the innermost being can generate the best. This is what we wish for all, under our continual blessings."
