Whispers from The Brighter World

Sunday, October 21, 2012 — 10:00 a.m.

Let your heart sing! Love is the centre point of its action. Blessed are those who have the propensity to love, to give their best in the service of a noble cause. Love is the only true driving force in any area of a life that transcends the ordinary. A true spiritual process is driven by the impulses of love. Without this unique and beneficial energy, nothing beautiful and great can be accomplished on this Earth.

"Our candidates have a broad field of action before them. They know the goal to be reached; they are working towards it and they possess in themselves — to some extent — the means to move forward. Faith in the Master and determination ensure that they take a great step forward on this unique path, the only one that enables a complete blossoming of the subtle being. All our brothers and sisters are aware of it; each advances at their own pace and yet this concerns all, who are helped and supported beyond what they can perceive. We are insisting while on this last leg of our heart-to-heart process where we can express ourselves. Time is pressing for everyone; we want the best for our fully committed aspirants. In stages, doors open up before them and show them a way to be followed which they could not see before. May all fully trust us and consider this Sahaj Marg approach for its true worth, as well as for the importance of its action on the beings who are receptive and determined to act in the right direction. What more can we do, what more can we say to those who do not yet fully assess the need to move forward? It's up to them to see and to act."
