Whispers from The Brighter World

Saturday, December 8, 2012 — 10:00 a.m.

Forget these moments of sufferings and sorrows; let your heart drink from the source of our hearts. It is inexhaustible for all those who follow us and implore us. These messages do a lot of good, and these findings rejoice and reassure us. Some people who were reluctant about them yesterday have started to consider them differently. Humans sometimes maintain a barrier of doubt, which thus deprives them from receiving benefits. Their nature is so complex. In each incarnation they are placed in front of difficulties that are meant to make them become aware of reality and move forward. A life free of trials would not facilitate their development. Each life provides new elements which must be faced; growing in the face of adversity is the challenge. Opening up to spirituality provides a new realm in one's life, one that fulfils the being beyond his expectations when faith is strong and determination is great.

"We thus can see so many souls awakening and shaping themselves in the most beautiful manner. We are attentive to all hearts that are thirsting for the Divine. There will be a greater and greater number of them. The history of humanity is like that; it cannot remain forever in the grip of illusion that characterises this world. We are working accordingly, as all of us here have lived on this Earth and have experienced the torment it inflicts. This is in the order of things; growing in the face of adversity, this is what an incarnation can offer. Whatever the circumstances, man or woman, rich or poor, all are facing the same laws related to the evolution of humanity. Vast is the programme; there is so much to do. Everyone must become aware of the situation and through their own personal evolution contribute to the evolution of all. Love will save the world; it is up to everyone to understand this and strive accordingly."
