Whispers from The Brighter World

Friday, December 14, 2012 — 10:00 a.m.

We have come a long way with these messages, and our brothers and sisters are nourished by them more and more. They have become aware of the opportunity offered to them in terms of benefiting from such teachings that herald the times to come. We must forge ahead; the new era is dawning on the horizon and we cannot continue to ignore it. A spiritual way cannot be confined to the past; it should also open up to knowledge, to that which is, as well as to that which will be. Preparing people's minds for future times is logical. These writings will endure and they will have to be aligned with the evolution of human beings who will be confronted with a reality that they cannot imagine today. Many still refuse the principle of reincarnation. Our aspirants do overcome these limitations. They are in tune with reality and accept this principle of communication that has been in existence since the mists of time, but which is, unfortunately, still denied by many people. We have already pointed this out: all sacred scriptures partake of this principle.

"Our abhyasis are willing to advance and they understand the true meaning of life; reincarnation is a major aspect of that. Hiding the truth and stagnating are not in line with the primary principle. It is time for us to seize a rare opportunity: that of climbing above the material world and advancing in knowledge. Very broad open-mindedness will allow us to go further and to combine the work on the self with the effects of the incarnate Master's transmission. This principle is not widely known; happy are those who take full advantage of it. Believe me, it is a rare opportunity in this world. Time is precious; may all truly become aware of it and make the most of it, with ardour."
