Whispers from The Brighter World

Monday, January 7, 2013 — 10:00 a.m.

The cycles of life are renewed. They bring about some changes over time; thus are the divine laws regarding current evolution. Anything can change and everything will change in a timely manner; humans and life as a whole need that stability. The changes are very subtle and just enough in this pivotal era in which other rules — beyond the current ones — will prevail on Earth towards good and evolution at all levels.

"Other planets, contrary to what humans believe, are much more advanced, and moreover, they don't believe they are the only ones that carry life in different forms. Minds evolve slowly, in keeping with the movements generated by the cosmic force upon which the total balance of creation depends. Each planet has its own rhythm, much like humans in terms of some of their behaviours. Upheavals are not errors, but necessities; they are meant to maintain a certain balance in the general order. Some renewals are necessary, thus does the Great Order set its laws. How can humans, in their smallness, understand the need for change? Transformations have always recreated life. The beyond, as you call it, also has strict rules where fantasy is excluded and the laws are very subtle, but this is another matter.

"May everyone follow their path and try to do their best. A spiritual way like ours is given to humans of this time for their greatest good. It is up to them to take full advantage of it; that is how it goes."
