Whispers from The Brighter World

Monday, January 28, 2013 – 10:00 a.m.

As you already know, the luminous point at the centre of the [esoteric] symbol represents the divine energy, that which is at the core of each cell of the human being, hence this representation. It will increasingly become a spiritual 'reality' by the effects it can generate as part of the sadhana. This symbol has not been given in vain. The time will come when it will be naturally integrated into the practice of many. Over time, many of our abhyasis will discover its power of action. Some of them already know this and use the symbol quite naturally. They do it by their own choice, and we let them have free rein so that they can benefit from it. Time does its work, as always, in our Mission and elsewhere.

Our abhyasis make choices; we propose and they adapt themselves in their own manner to what seems feasible for them. We cannot force anything; each one progresses as they see fit and for their own good. We note the satisfactory effects of this practice, where this symbol takes its place. Each one gives the symbol a place that suits them, which gradually helps them to include it in their daily ritual. Minds are opening up to this new approach; it marks a milestone in the discovery and ownership of an important asset.

Going ever deeper into oneself, in the heart of silence and a very subtle vibration, is the goal to be reached. We propose means that are accessible to all. They will make their way, and this habit will take its rightful place over time. Each and every one in our

Mission is on their way according to their potential and understanding. We are working towards the awakening of all with a view to achieving the ultimate goal.

The overall result is very satisfying; we can only rejoice in it and accelerate the process for a collective and decisive advancement to follow in this beautiful Mission – 'Sahaj Marg'.
