Whispers from The Brighter World

Tuesday, January 29, 2013 — 10:00 a.m.

Here is peace and harmony; is this not what your heart yearns for! This preamble leads it to serenity — one that is suitable here in this sacred ritual, where our souls are attentive to your souls and infuse, through these writings, a vibration into your hearts. Many of our faithful readers feel that vibration and they enjoy it fully. These messages have multiple effects, and the more refined a being, the more he benefits from them.

"Nothing in our Mission is done without reason. Over time, some aspects of the practice will be highlighted, as we have done in the previous message concerning the possibilities offered by the new symbol. Each one should be left to their own understanding of things; we propose and our abhyasis experiment and practice in their own way in the framework of our teaching. This teaching may seem very simple, but steadfast practice conducted with the greatest keenness, as well as with a fervent heart, leads a being to the best results. For many of our brothers and sisters, this commitment has in some way changed their lives. Subtlety is developing in them gradually but surely. This is a major advantage in a process like this.

"Going beyond appearances, going somehow beyond one's human potential — that which is given to man in this current incarnation — testifies to the aspiration of the subtle being towards self-realisation. How many people follow such a process and are aware of what characterises them beyond physical appearances? Not many, in reality, compared to the current number of humans inhabiting this planet. Our abhyasis are somehow privileged; they are aware of what is offered them and they feed on it according to their own needs. The call of a

fervent heart is always heard; we do not remain insensitive to its impulses towards us. All, according to their longing, benefit from our attention. The light is at the end of the road; a day will come when, to our delight, each one of them will discover it.

"May all our aspirants motivate themselves towards this prospect, driven by our love towards them. This is how it is."
