Whispers from The Brighter World

Wednesday, January 30, 2013 — 10:00 a.m.

Everything is forgotten in these blessed moments when you immerse yourself in us. This kind of ritual is necessary, too; each of our abhyasis has their own ritual that leads them to the heavenly door. Thus does spiritual work take shape, one that is supported by faith and fervour. The aspirant needs such breaks; he needs a moment of immersion in a subtle vibration supported by a heartfelt call. Therefore repetition is also necessary here; it gives full scope to our action. Reaching each one who follows us and trusts us, by fostering a process through the grace generated by the process itself — this is the normal course of action and it is in the remit of a spiritual way like ours. Many aspects should be considered. All this may be beyond the comprehension of a vast majority of humans who are far from being sensitive to such subtleties.

"Awakening, that which opens the heavenly doors, is the ultimate goal each one should reach while on this Earth. The need for an incarnation lies in this: to rise spiritually, to become refined and to understand the reality of that incarnation, of life in all its expression — here and elsewhere. That should be the primary motivation in the existence of all human beings. Finding one's way and being able to seize this opportunity and transform one's Earthly existence through an appropriate approach — these show innate wisdom; such wisdom makes it possible to achieve the best and facilitate the elevation of a blessed soul.

"May all our brothers and sisters who are blessed with these privileges advance in our Mission according to their innermost aspirations, with the appropriate assistance we provide them. 'What must be will be' — a sincere heart is always heard."
